

Install Fiber Drop Cable Quickly Without the Need for Fusion Splicing

PerfectVision's Preconnectorized Fiber Drop Cable Is Your Install Solution

FIBER ACCESS TERMINAL

Fiber Access Terminal is a critical link in a FTTx deployment and the spot where the network cable is spliced into and prepared for dropping to the home. PerfectVision offers 8 port and 16 port configurations and by utilizing the PerfectVision group you can have these closures come loaded with the PLC splitter ready for splicing into the OSP Fiber Network.

Contact PerfectVision for part numbering.

FIBER DROP CLAMP AND P HOOKS

The fiber drop clamps from PerfectVision will fit a variety of drop cable sizes. Anchoring to the P hooks on the pole and home, the self-support drop cable hangs between with no lashing needed.

Fiber Drop Clamp
Part Number: SI-0972SBL

PRECONNECTORIZED FIBER DROP CABLE

Drop cables serve as the final link to the House before plugging into the NID. Most drop cables are run aerial from the FAT in the air to the home, but some can and do run underground through conduit as well. With the standardized lengths, the NI installers can easily run the proper cable length to allow the proper amount of slack in a NID box and save on installation time.

Fiber Drop 50 meters SC/APC to SC/APC
Part Number: PV09BCLB001CC-050

NETWORK INTERFACE DEVICE (NID)

The NID serves as the demarcation point, between the carrier's local loop and the customer's premises wiring. These can be installed outside on the house or inside the home - usually in the basement closet. The ONT can be placed in or near the NID box for quick connection to the home network.

Fiber Optic Termination Box 6 SC Simplex/LC Duplex
1x8 PLC Splitter
Part Number: PVFTTHNB

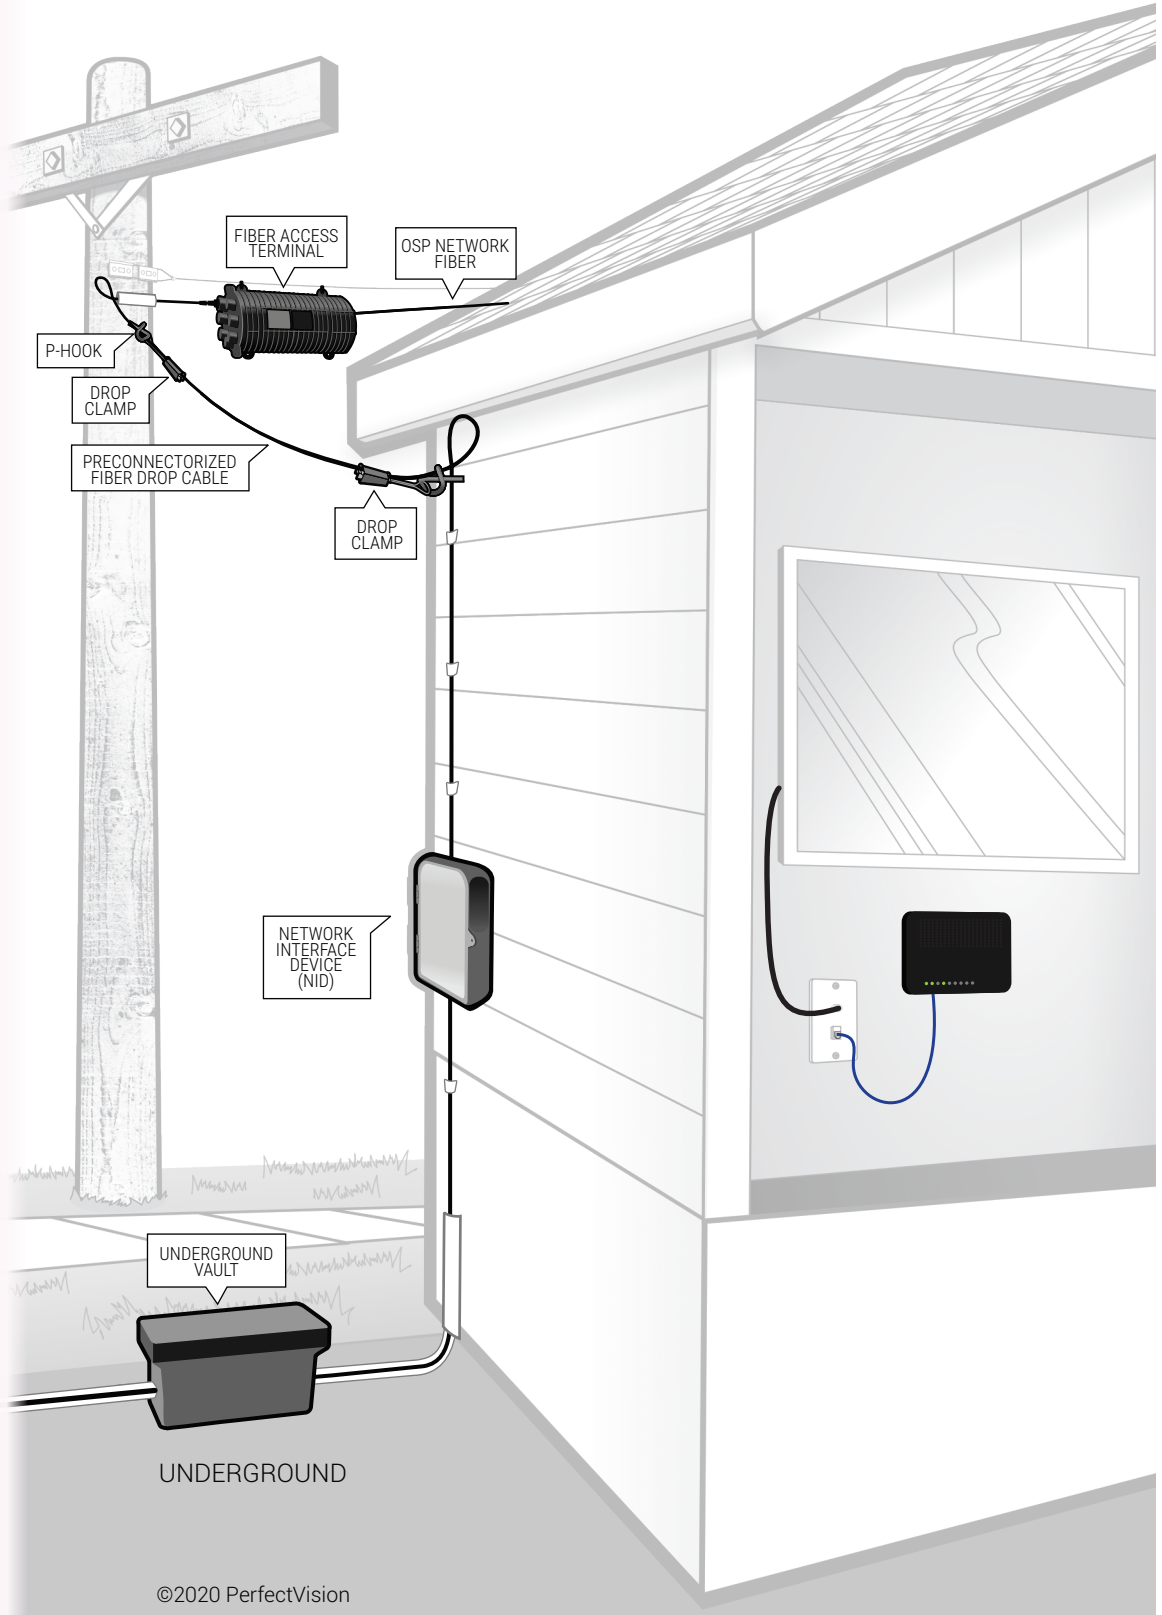

FTTH SURFACE MOUNT BOX

The surface wall mount box will help with distributing fiber jumpers to modems and ONTs for residential home installs. The sleek low profile design fits well in any home install.

FTTH Fiber Optic 2 Port Surface Mount Box
Loaded with One SC/APC Adapter
Part Number: PVFTTHSCAPC2

OSP NETWORK CABLE

Partnering with Prysmian ADSS Cable (All-Dielectric Self Support) you will get a reliable performance and up to a 190 meter span length and with standard ADSS cable you will get 300-500 meter span lengths. Fiber counts are available up to 288 fiber with no lashing needed. Other high fiber counts available.
